Education

Course	Year	CGPA / %
Dr. B. R. Ambedkar National Institute of Technology Jalandhar (B.Tech CSE)	2027	7.05/10.0
Indian Community School, Kuwait (Class XII)	2023	89.8%
Indian Community School, Kuwait (Class X)	2021	91%

Technical Skills

Programming Languages: Python, C++, C, JavaScript, SQL
Data Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel, Streamlit
Machine Learning: Feature Engineering, Data Preprocessing, EDA, Model Building, Model Evaluation
Generative AI & NLP: LLMs, Prompt Engineering, Generative AI, Natural Language Processing, Embeddings
RAG & AI Engineering: Retrieval-Augmented Generation (RAG), Semantic Search, Document Chunking, Vector Search
Frameworks & Databases: LangChain, ChromaDB, MongoDB, MySQL, SQL Server
Web Technologies & Tools: HTML, CSS, React.js, Git, GitHub, VS Code, Streamlit
Core CS: DSA, DBMS, Operating Systems, Computer Networks, OOP, Information Security

Work Experience

Data Analyst Intern **Jun 2026 – Jul 2026**
XYlofy AI *Remote*

- Performed data cleaning, preprocessing, and EDA using Python, Pandas, NumPy, and SQL to identify trends and data quality issues.
- Analyzed structured datasets using SQL (joins, aggregations, subqueries, CTEs, window functions) to extract business insights.
- Built interactive Power BI dashboards and KPI reports using DAX, filters, and slicers to track sales performance and customer behavior.
- Performed data validation to identify missing values, duplicates, inconsistent formats, and anomalies before analysis.
- Developed analytical projects on house price prediction, employee attrition, and sales forecasting using Python and ML techniques.
- Applied statistical analysis to understand relationships between variables and support data-driven decision making.

Junior IT Intern **Jun 2025 – Jul 2025**
Al Mailem Groups *Kuwait*

- Configured and maintained Windows desktop systems, troubleshooting hardware and software issues for day-to-day operations.
- Assisted with networking tasks including LAN configuration, IP addressing, and connectivity troubleshooting.
- Performed SQL operations including data retrieval, filtering, updating records, and writing basic queries.
- Provided technical support by diagnosing system issues and assisting with software installation and configuration.

Projects

ResearchPilot – AI-Powered Research Assistant | *Python, RAG, ChromaDB, Sentence Transformers, Gemini API, RAGAS*

- Built a RAG-based research assistant that processes PDF research papers and answers natural-language questions using retrieved document context.
- Implemented document ingestion, text chunking, embedding generation, and semantic retrieval using Sentence Transformers and ChromaDB.
- Integrated Google Gemini API for context-grounded answer generation and enabled users to inspect retrieved passages and supporting evidence.
- Integrated RAGAS evaluation to assess faithfulness and answer relevancy, with a Streamlit dashboard for reviewing and exporting evaluation results.

Power BI Sales Dashboard | *Power BI, DAX, Power Query, Excel*

- Developed an interactive sales analytics dashboard to monitor revenue, profit, orders, product performance, and customer trends.
- Created DAX measures and KPIs for Total Sales, Total Profit, Profit Margin, Average Order Value, and year-over-year performance analysis.
- Performed data cleaning, transformation, and data modeling using Power Query and established relationships between multiple datasets.
- Implemented interactive slicers, quarter-wise filtering, drill-through pages, and dynamic visualizations for detailed business analysis.

Certifications & Achievements

AI Fluency: Framework & Foundations – Anthropic Jul 2026
Data Analytics Job Simulation – Deloitte, Forage Jun 2026
Data Science Job Simulation – British Airways, Forage Jun 2026
